Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

I. Group I, claim(s) 1-8, drawn to a recording apparatus with adjustable height of the print head carriage guide shaft, where the shaft keeps a constant position in the printing media transporting direction classified in class 400, subclass 283.

II. Group II, claim(s) 9-11, drawn to a recording apparatus with adjustable height of the print head cartridge outside shaft wherein the print head carriage is adapted to set the height of the guide shaft classified in class 400, subclass 283.

III. Group III, claim(s) 12, drawn to a recording apparatus with adjustable height of the print head cartridge guide shaft wherein a gap adjustment member sets the initial height of the guide shaft classified in class 400, subclass 283.

2. The inventions are distinct from each other because:

The claims of these three groups are directed to different inventions which are not linked to form a single general concept. The claims in the different groups do not have in common the same or corresponding "special technical features." In particular, the structural arrangement of the guide shafts in Groups I, II and III are completely different since in Group I, the shaft keeps a constant position in the printing media transporting direction, in Group II, the print head carriage is adapted to set the height of the guide shaft, and in Group III, a gap adjustment member sets the initial height of the guide shaft.

Art Unit: 2854

Applicant is advised that the response to this lack of unity of invention requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143) See MPEP 1893.03(d).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrea H. Evans whose telephone number is (571) 272-2162. The examiner can normally be reached on Monday- Friday; 8:30a-5:30p.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Hirshfeld can be reached on (571) 272-2168. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
